# From new homes to custom builds

At NXT Cabinets we design, fabricate and install custom cabinets for all of your home or commercial project needs. From new homes to custom builds, home remodels and renovations, to business needs, we have you covered when it comes to quality cabinets.

# About

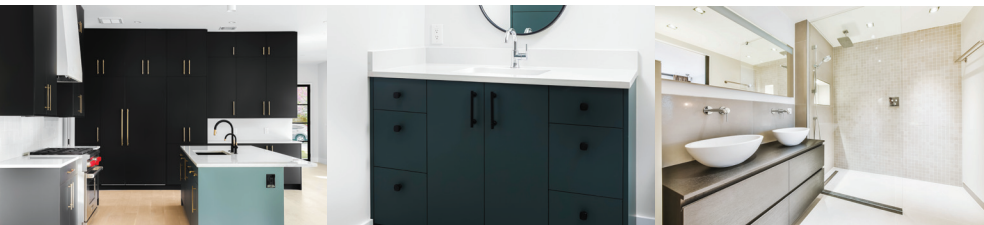

Our clean, European designs are ideal for achieving a look that is functional, yet timeless- a classic look for modern times.

NXT Cabinets is a sister brand to NEXT Custom Homes and launched in 2021 to help serve the Central Texas building community. We saw an opportunity to expand our services beyond home construction to offer the same quality products as big cabinet suppliers, but at a local level.

*Our goal is to serve homeowners and business owners alike to achieve the look they want, all with a personalized touch.*

# NXT

When you work with NXT Cabinets you interact with the designer, maker and service installers to achieve the ideal look for your space. We cut out the middle man, which means you'll work directly with our skilled team to get your project started and completed quicker.

# Family owned and operated

# Our Process

Bring your plan or design idea to our office for an introductory consultation. Here you'll meet with our project manager to talk through product options, design details, cabinet colors, drawers, finishes and more.

Step 1

Our designers will create a rendering of your ideal space. Once this is approved a proposal will be sent outlining the project timeline and fees.

Step 2

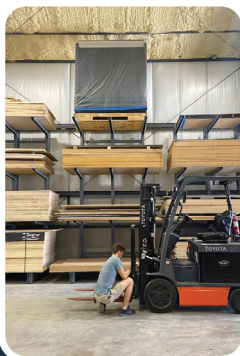

With a proposal and contract signed, we then get to work fabricating your cabinetry. You're welcome to stop by our shop to see this step in action!

## Step 3

After the cabinets are built, we'll coordinate a date and time for delivery and/or installation of the products.

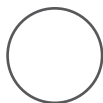

## Step 4

## Boxes

Choose from the following options for cabinetry boxes:

white

Black

uv birch

paint grade  
birch

# Our Materials

## Fronts
